sneha.kawalee@gmail.com | +91 8830145689
linkedin.com/in/snehakawale | Nagpur, Maharashtra

SKILLS

- Programming Languages - NodeJS, JavaScript, Java, Python
- Frameworks - Express, React.js, NestJS, Fastify, Typescript, FastAPI
- Vibe Coding & AI Dev Tools - Cursor, Claude AI, GitHub Copilot — AI-assisted rapid prototyping & development
- Data Streaming & Caching Stack - Kafka, Redis
- Databases /ORM - MongoDB, MySQL, Postgres, Prisma
- Deployment - AWS EC2, Docker, Git, Bitbucket
- Cloud - AWS, Azure

WORK EXPERIENCE

Senior Engineer, AI **Dec 2024 - Present**
Konverge.AI | Nagpur, India

- Built and maintained backend APIs for a no-code/low-code Edtech platform supporting instructor-led, project-based education across academic and corporate environments.
- Implemented secure authentication, role-based access, real-time notifications, and lab orchestration services while designing optimised data models to simplify AI/ML pipeline building and improve learner engagement.
- Developed a comprehensive Housekeeping service management system that allows users to seamlessly book beauty treatments, haircuts, massage therapy, cleaning, plumbing, and carpentry services.
- Built a dynamic and responsive frontend using React, ensuring a smooth and engaging user experience.
- Designed and implemented a scalable backend architecture with NestJS, enabling efficient service management and seamless user interactions.

SDE **April 2021 - Nov 2024**
Pinnacle Teleservices Pvt Ltd | Nagpur, India

- Designed and developed a high-capacity, high-throughput WhatsApp Campaign Processing system using Kafka, NodeJS-based microservices, enabling the delivery of millions of messages to a vast audience
- Reduced processing time by 90% and supported over 2,000 customers, including Flipkart, Maha Government, and Pizza Hut, with the WhatsApp Campaign Processing system.
- Deployed applications on Amazon EC2, integrated S3 for media uploads, and implemented application scaling, resulting in a 75% reduction in downtime and optimised production environments.
- Created the backend of a Flowbuilder application, empowering clients to create and test custom chatbots on the WhatsApp platform, making it easier to understand and address end-user needs.
- Developed a React-based Reporting and Analytics panel to enable real-time tracking of user feedback on WhatsApp bot interactions, leading to improved user experience and data-driven decision-making.

- Implemented a robust data encryption and decryption feature for API communications, enhancing the security of sensitive information and ensuring compliance with data protection standards.

PROJECTS

Elevante AI

AI-enabled Edtech platform for scalable and hands-on AI and ML learning

- Implemented Dagster and RabbitMQ to orchestrate AI lab workflows, with Node.js acting as the integration layer between frontend applications and the AI backend services.
- Built backend APIs in NestJS for LLM services, labs APIs and Model recipes for different workflows.
- Created ReactFlow-based labs to implement different workflows as per the learning material. These flows were of the Agentic system, RAG, Classification, Regression and other AI ML concepts.

Konfer AI

Agentic AI system for Compliance and Regulation Management

- Developed backend services in NodeJS with Prisma ORM and Hasura-powered GraphQL APIs to support real-time evaluation of enterprise AI systems against regulatory requirements.
- Built scale-friendly APIs for an automated compliance assessment engine and reporting module ("Konfer-Clear") that generated quantitative benchmarking scores across multiple regulatory frameworks.
- Implemented score-calculation logic consumed by a React frontend for dynamic visualisation and compliance insights.

CERTIFICATIONS

- Azure Fundamentals AZ900 [certificate link]

EDUCATION

RCOEM, Nagpur. **Aug 2017 - Jun 2020**
Master of Computer Application **CGPA: 7.86/10**

Relevant Coursework: Object Oriented Programming, Databases, Discrete Maths, Data Structures and Algorithms, operating systems, Computer Networks, Machine Learning, Artificial Intelligence, advanced data Structures and Algorithms, Image Processing
